## ***Euro-Rite Advantage (ERCADV) 2020 Catalog Installation Instructions (Revised May 17th 2012)***

### **Introduction**

Our revised ERCADV catalog features the following enhancements:

- Addition of our Yaletown door in four colours - Onyx, Graphite, Ruby & Quartz.
- Additional options for accessories. We now have 183 options to choose from in our handles and knobs. You can view the full selection on our website under the Products tab ->accessories
- Colour renderings have been updated.
- The orientation of the blind base cabinets has been corrected. The L or R indicates the blind panel and not the door.
- The orientation of the vanities has been corrected. The L or R indicates the placement of the drawers.
- The pot and pan and 4 drawer base units have been modified to display the correct drawer height dimension.

### **Catalog Installation**

Please note that this catalog requires Microsoft Access Runtime version 2007. The installer will check if this program is present in your computer. If not, download and install the Access Runtime on your computer:

- [www.2020design.ca/Files/AccessRuntime.exe](http://www.2020design.ca/Files/AccessRuntime.exe)
- (ensure you have internet connection and have security rights to install programs).  
Note: once Runtime is installed, this step will no longer be required for future catalog updates.

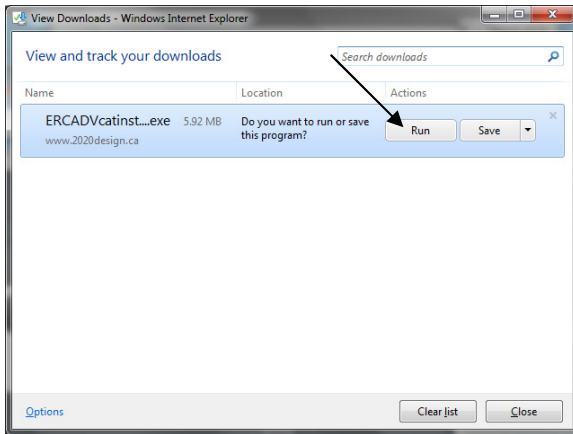

To install the updated ERCADV, close your 2020 program.

Click on the Install ERCADV:

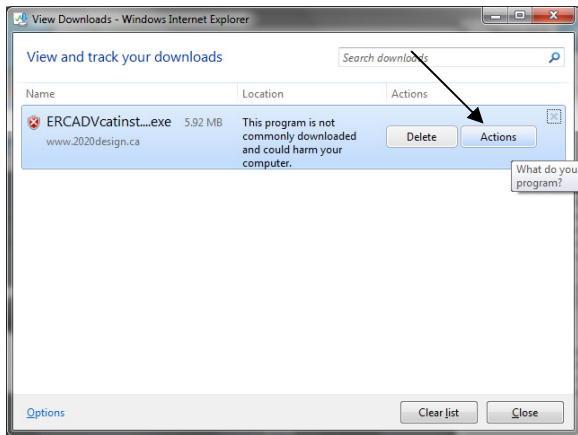

[www.2020design.ca/EuroRite/Advantage/ERCADVcatinstall.exe](http://www.2020design.ca/EuroRite/Advantage/ERCADVcatinstall.exe)

- You will see a pop up screen below; it may vary slightly from the below images depending on the version of internet explorer you are running; select the "run" option.

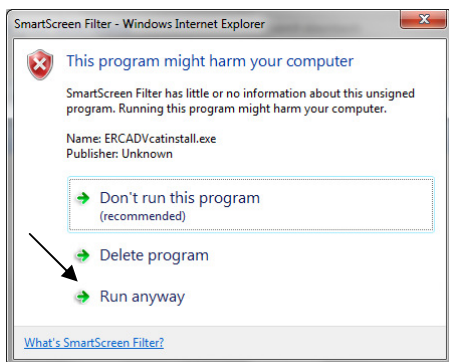

*European Styling – Built Right!*

➤ This pop up screen will appear:

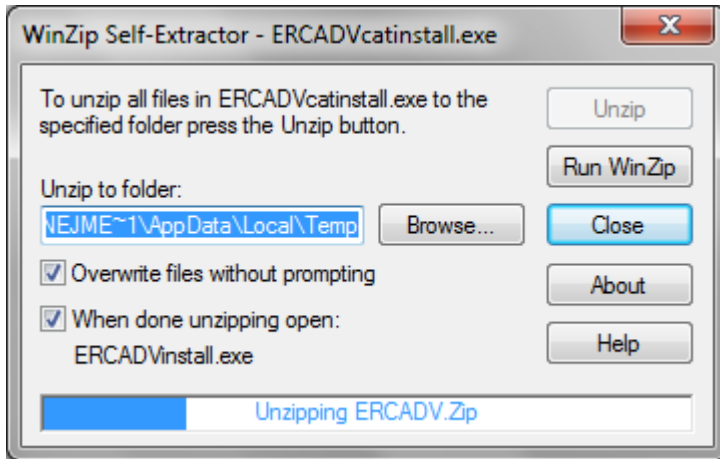

➤ Select Actions and you may see one of these 3 options.

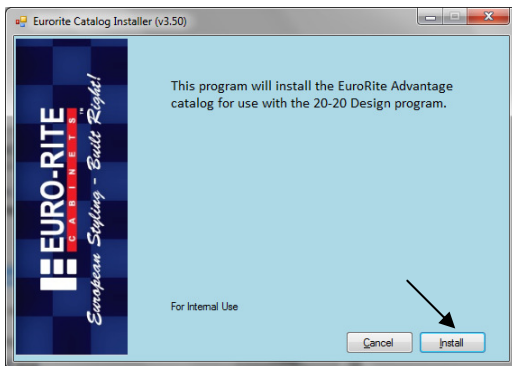

➤ Select "run anyway"

*European Styling – Built Right!*

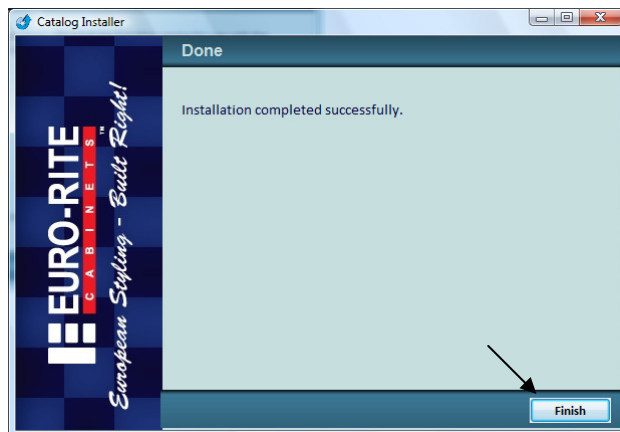

- Wait for the files to unzip...

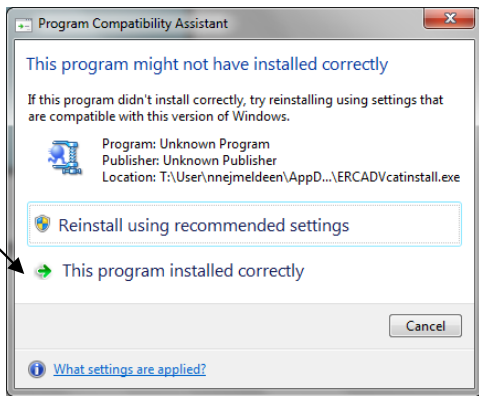

- Click Install...

- Select "Finish".

*European Styling - Built Right!*

- Select “this program installed correctly” to complete the installation.

Voila! ☺

## Updating Designs done FROM ERC3Box to ERCADV Catalog

It is necessary to update designs created in original ERC3Box2 to the revised ERCADV to implement the new features and access the report. To do so, follow these 9 steps.

1. In the design, go to the Edit → Switch Items function.
2. In the top left drop down list, select the catalog you want to switch from (ERC3Box2).
3. In the top right drop down list, select the catalog you want to switch to (ERCADV).
4. Click the Automatic button and 2020 will switch as many items as it can.
5. The Switched Items Tab lists the items 2020 was able to switch.
6. The Items Tab will list the items 2020 could not switch.
7. Manually switch the remaining Items by selecting an item on the list, go to the catalog on the right and find the item you want to switch to, highlight the item and then select the Manual button.
8. Repeat the previous step until you have manually switched all remaining items.
9. Click OK.
